RE: non compliance application 10/634,369

PAGES: 23 including this

Date: 8/28/06

Response to Office Action dated August 24, 2006 Examiner: Shumaya B. Ali

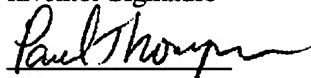

Ref: Application No. 10/634,369

RECEIVED
SEP 11 2006

The issue was a lack of markings in the specification to indicate changes. The reason is that there were no changes other than an increase in line spacing to 1.5. The non compliance issue has been addressed by printing by hand the words "Changed line spacing to 1.5" under the first line "SPECIFICATION[currently amended]". The entire patent application (except figures) and this letter were faxed in.

I also mention the rebuttal was sent in 3/1/06 and then again on 6/6/06.

I'm re-faxing this document because the fax of 8/28/06 had something wrong with it. I viewed what USPTO received using PAIR and a 2" section of every page was missing about a third of the way down the page. I received a Notice of Non-Compliant Amendment and couldn't understand why it said things were missing and now I see why. I'm intending this to be a replacement for the 8/28/06 fax. I'm just going to use a different fax machine.
